LCM-04

5/20/03

Eva Harris

Alt. A - Does not address fuels or forest health
this alternative perpetuates the problem

Alt. B - some intriguing concepts but is just to restrictive
to address concerns of fuels of forest health

Alt. C - interesting but so many changes - historic conditions are not
responsive to concerns - wildlife - trees
weather has changed, species changed

All Alternatives
- make noncommercial wood that comes out be made available to the
local community - fire wood, poles etc., free use permit, sell it

Mahogany - quail (mountain) use Mahogany when covering ground
not sure what to do

Alt D - Not natural - to much Diversity on mountain to treat it uniformly

PT - close & Butter is good

Move Road Away from Riparian Area

Roads - there are sections that should be closed - work with Miners
Relocate main road

Alt E
Does not address diversity of the mountain

Eva Harris 5/20/03

AH F. - Pine - cover % seems to extreme
How can stand adapt without excessive stress

fire behavior is different for different species

Support 20" Juniper limit for big juniper

~~Don't take all the Big Trees~~

Monitoring is critical

See value in both CTF in terms of Tree Treatment
