LCM-03

BLM

May 20-2003

The thinning that has been done around homes may be OK but the butchering that went on destroyed a lot of the wildlife food an left open areas for hawks, owls + eagles so the rabbits + squirels are out in open for prey.

Unless the large trees are cut and smaller trimed up to 7' or so, and leave all the douglas fir possible: just leave the whole mt. Little Canyon alone.
