# PARTIALLY SURVEYED TOWNSHIP 0 SOUTH RANGE 0 WEST OF THE WILLAMETTE MERIDIAN, OREGON

All Oregon and Washington townships are surveyed from Willamette Meridian and base.

Protraction Diagram No. 40, accepted 7/15/1966
File No. 14 (33FR4215 3/6/1968)

Identifies plat from which unsurveyed lands and protracted acreages were designated.

County in which the township is located; if in more than one county, the boundary and names will be shown as below.

BENTON COUNTY
SALEM - EUGENE

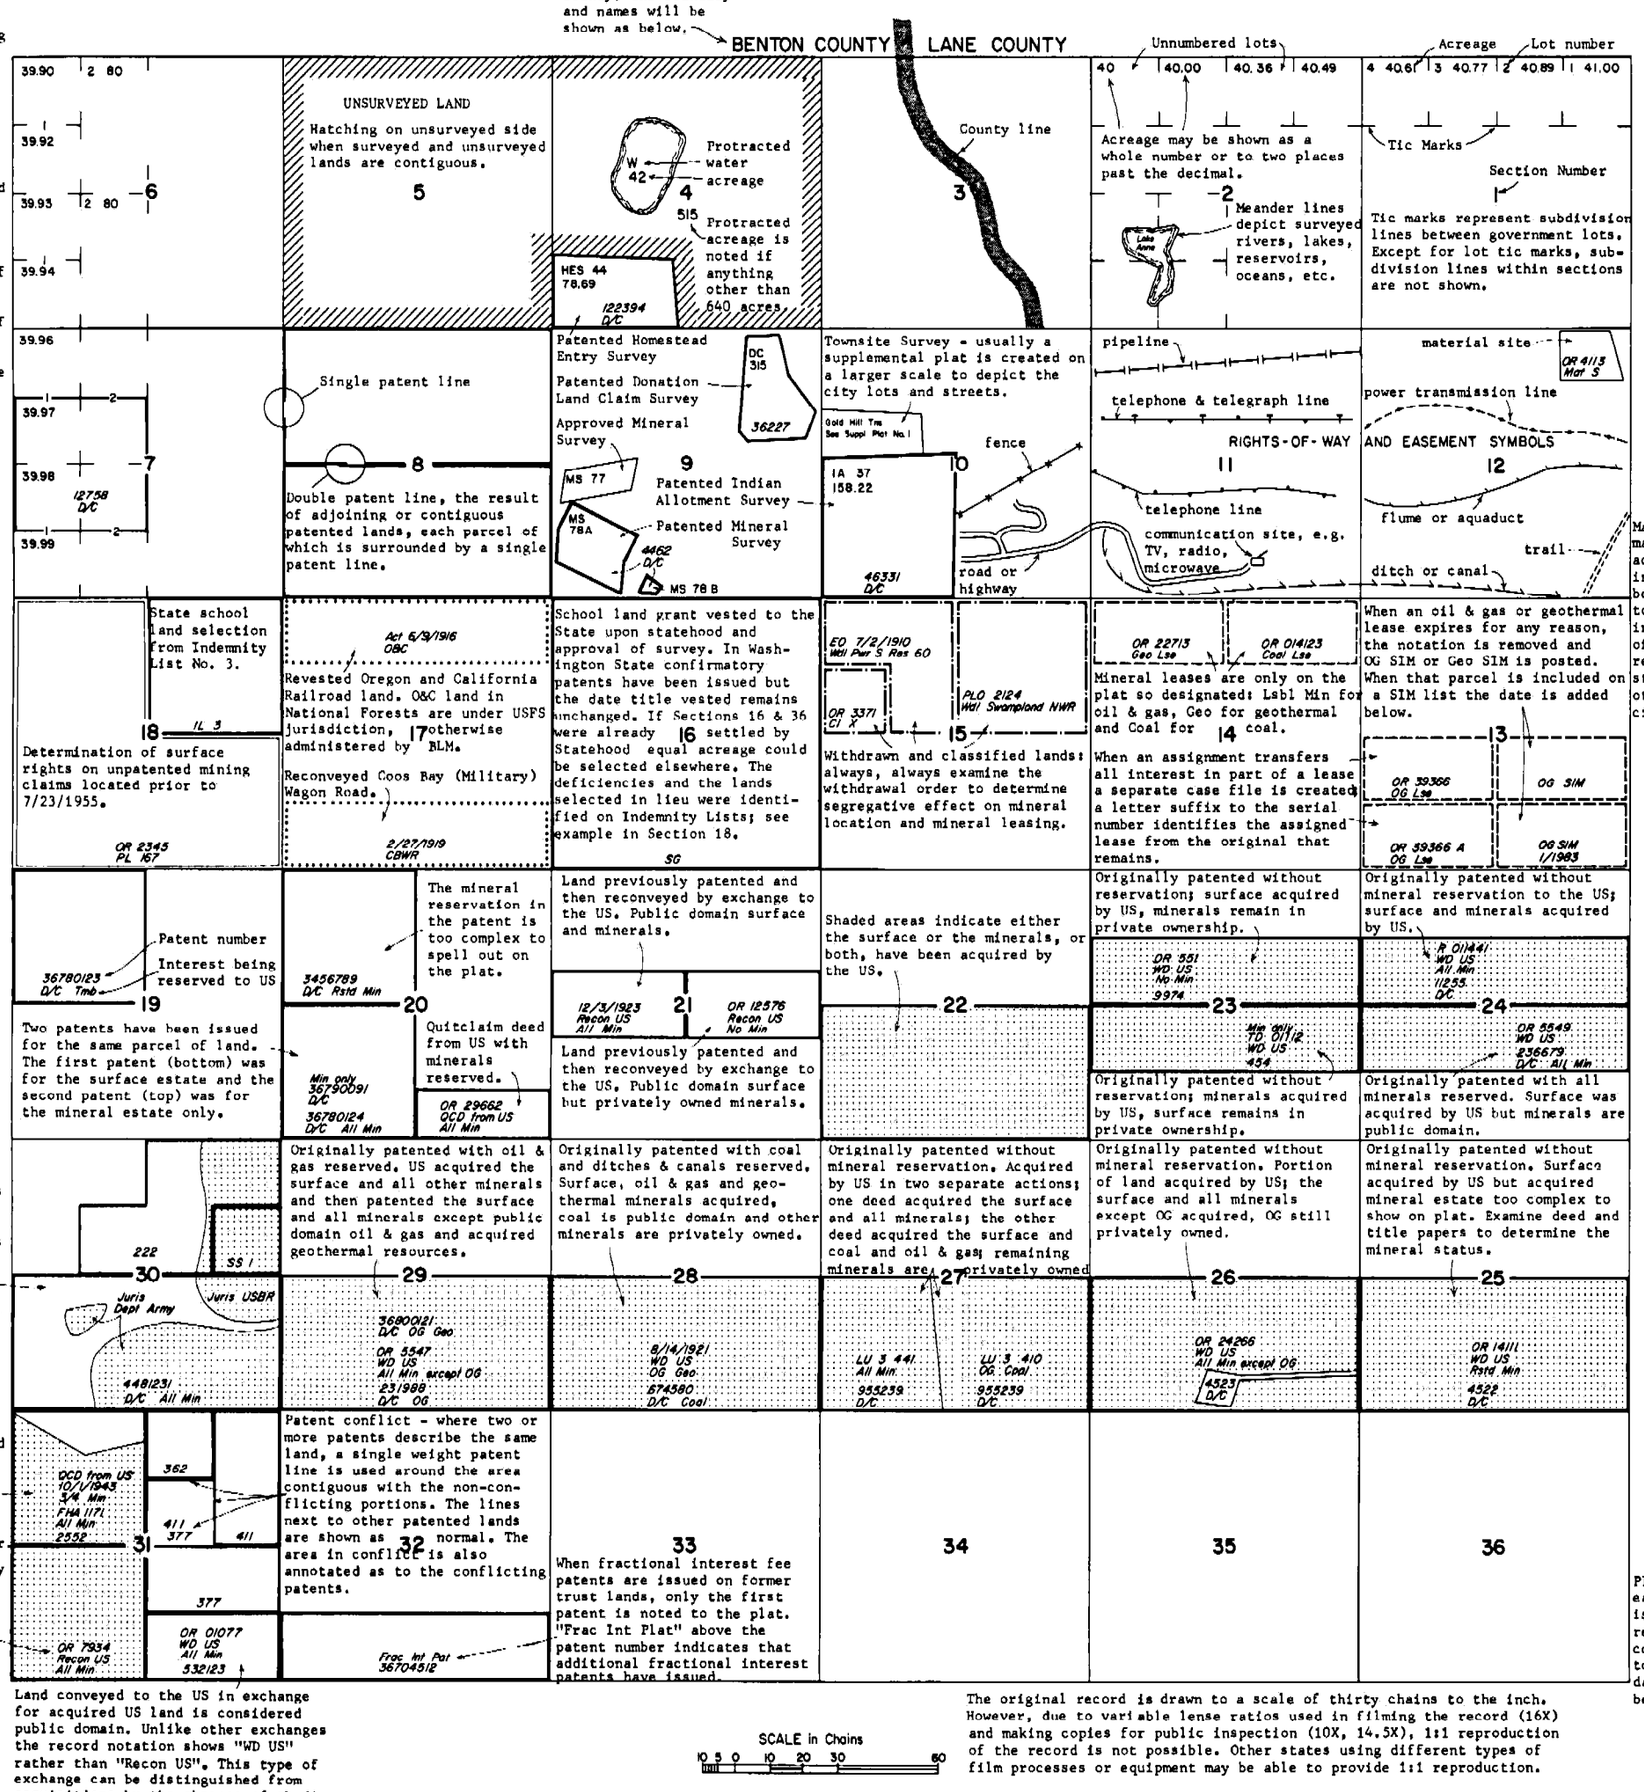
BLM district or districts in which township is located; district boundaries not depicted.

TITLE OF PLAT: MT = Master Title
Lsbl Min = Leaseable Mineral
Geo = Geothermal Resources
Coal = Coal

STATUS OF PUBLIC DOMAIN LAND AND MINERAL TITLES AND ACQUIRED LANDS

## MT PLAT

The unusual method of lotting shown in Section 6 and 7 was used only between 1851 and 1866. Two lot 1's and two lot 2's were designated in the sections along the northern and western boundaries of the township. Patenting part of the lots, as shown in Section 7 created so much confusion that the practice was dropped in favor of the lotting technique used today. The public domain lands in the west half of Section 7 would be decribed as that part of lot 1 in the NW¼NW¼, that part of lot 1 in the SW¼SW¼, that part of lot 2 in the NE¼NW¼, and that part of lot 2 in the SE¼SW¼.



### INDEX TO SEGREGATED TRACTS

The original record is drawn to a scale of thirty chains to the inch. However, due to variable lense ratios used in filming the record (16X) and making copies for public inspection (10X, 14.5X), 1:1 reproduction of the record is not possible. Other states using different types of film processes or equipment may be able to provide 1:1 reproduction.
