Note: Road data sources may include one or more of the following: USGS DLG and DOQ data, GPS data, and field mapping. Any additional roads discovered or created on the ground in Abert Rim WSA in the future would be designated closed unless needed for resource management purposes. Any additional roads discovered or created on the ground in the Lake Abert ACEC in the future would be considered open unless determined in a subsequent analysis that they are no longer needed or are causing resource damage.

Note: Due to wilderness inventory errors or inaccuracies that existed in the maps available at the time the wilderness inventory was conducted, some trails or "ways" which appear on the Oregon Wilderness Final EIS maps (USDI-BLM 1989a) do not actually exist on the ground as depicted and, therefore, are not shown on this map.
