INTRODUCTION:

Brett Jantze Guide Service LLC (Jantze), operated by Brett Jantze, has held Districtwide, commercial Special Recreation Permits (SRPs) for big game and bird hunting in the Burns District since 1999. The Wagontire Unit in the Lakeview District was added to the permit in 2001. Most of Jantze's activities under the current permit, SRP #OR-020-RP-02-06, occur on private land, but adjacent public land is used. Jantze also has SRPs issued by the Vale District, Bureau of Land Management (BLM) and the Malheur National Forest.

While the Andrews Management Framework Plan (MFP) is silent concerning the proposed action and alternative, it is a stated objective of the MFP to "Provide a variety of recreation opportunities. . ." (p. 7). The Three Rivers Resource Management Plan (RMP) is also silent for the proposed action and alternative. However, one Recreation objective includes the specification to "provide for unstructured outdoor recreation activities with the necessary . . . services." Issuance of a permit would be in compliance with all State, local, and tribal government laws, regulations, and land use plans.

SUMMARY OF PROPOSED ACTION AND NO ACTION ALTERNATIVE:

The *Proposed Action* would allow the permittee to continue current operations and would allow for reasonable business growth over the next year. Jantze would supply guide services for deer, elk, antelope, and bird hunting trips in the Burns District. A majority of the use would be on private land in the Oregon Department of Fish and Wildlife (ODFW) Malheur River hunt unit, with very little time spent on public land in the Burns District. Base camps would be on private land. This does not represent a change from the current operating plan.

The *No Action Alternative* would allow the permittee to continue operations at the same level as the 2000 season. Jantze would continue to operate hunting trips as has been done in the past.

DECISION:

As a result of the environmental analysis presented in the Environmental Assessment (EA), it is my decision to approved the Proposed Action. The rationale for the FONSI supports this decision. The Proposed Action, coupled with the mitigation measures detailed in the EA and FONSI, has led to my decision that all practicable means to avoid or minimize environmental harm and to protect wilderness values have been adopted. Selection of the No Action alternative would not provide for resource protection. This decision is consistent with the Andrews MFP (1982) and the Three Rivers RMP (1991).

All resources have been evaluated for cumulative effects. It has been determined that cumulative effects would be negligible for all resources.

FINDING OF NO SIGNIFICANT IMPACT:

Based on the analysis of potential environmental impacts detailed in the attached Environmental Assessment (EA), I have determined that approval of the Proposed Action, when coupled with the mitigation measures presented and detailed in the EA, will not have a significant impact on the human environment and preparation of an Environmental Impact Statement is not required.

Rationale:

The activities described in the proposed action will, as best can be determined, not cause unnecessary and undue degradation of public land. Resources analyzed in the EA include Areas of Critical Environmental Concern (ACECs); Cultural Resources; Migratory Birds; Noxious Weeds; Threatened, Endangered, and Special Status Species; Wetlands/Riparian Zones; Wilderness Study Areas (WSAs); Socioeconomics; and Wildlife. Effects to these resources are considered nonsignificant (based on the definition in 40 CFR 1508.27) for the following reasons:

ACECs: Using existing trails would minimize effects to Burns District ACECs.

Cultural Resources: Cultural resources could be affected if the campsites are located on or near cultural sites. Disturbances could include collection of artifacts. As described in the mitigation below, archaeological inventories will be conducted at campsites in order to minimize these effects.

Migratory Birds: Effects to migratory birds would be either be short term or minimized through permit stipulations.

Noxious Weeds: The potential for spread of noxious weeds is always present, but the routes and trails would be monitored and treated, if needed, and minimized through preventive measures.

Threatened, Endangered, and Special Status Species: Effects to Threatened, Endangered, and Special Status Species would either be short term or would be minimized through permit stipulations.

Wetlands/Riparian Zones: Any effects would be short term and would be minimized through the use of existing trails and campsites.

WSAs: There could be short-term effects to solitude in the WSAs.

Socioeconomics: The permittee would contribute directly and indirectly to the Harney County economy.

Wildlife: Wildlife displacement and habitat disruption would be short term and minimized through the use of existing trails and campsites.

Mitigation Measures:

Approval of this proposal is subject to the following mitigation measures which will be included as stipulations attached to the SRP.

ACECs: Vehicle use in ACECs will conform to the current Off-Highway Vehicle designation.

Cultural Resources: Traditionally used campsites will be inventoried and assessments will be made. If it is determined cultural resources are being threatened or damaged, further mitigation will be undertaken.

Migratory Birds: Camping will be limited to established campsites that are appropriate for group use.

Noxious Weeds: To ensure that noxious weed seeds are not spread from other areas, all vehicles and equipment will be cleaned prior to entry onto BLM land. If permittee camps in or travels through noxious weed-infested areas, equipment and vehicles will be cleaned on-site. Weed identification booklets and information will be given to the permittee. The permittee is requested to notify the BLM of the location(s) of any noxious weeds found.

Threatened, Endangered, and Special Status Species: All human waste will be packed out on vehicle-supported trips or buried at least 200 feet or as far as possible away from camps, trails, and water sources when traveling on foot. All camps will be in previously disturbed areas or done with minimal disturbance.

Wetlands/Riparian Zones: All human waste will be packed out on vehicle-supported trips or buried at least 200 feet or as far as possible away from camps, trails, and water sources when traveling on foot. Down trees will not be removed from streambanks.

WSAs: All permittee activities will incorporate "Leave No Trace" practices. Hunters will travel single file on defined trails or will spread out where no trails exist. Cat holes will be used for solid human waste when traveling on foot. All toilet paper will be packed out. All firewood will be "dead and down" - no collection from standing trees.

Wildlife: All camps will be at least one-quarter mile away from isolated water sources to allow wildlife access.

Monitoring:

In addition to standard BLM monitoring of the SRP for compliance with permit stipulations, the following monitoring will be conducted.

ACECs: RNAs will be visually monitored periodically for natural or human-caused disturbances. Key plant species will be monitored at specific sites to determine changes in population health.

Cultural Resources: Traditionally used campsites will be inventoried and any effects will be measured.

Migratory Birds: Bird monitoring transects will be established according to protocol along riparian areas used by the permittee.

Noxious Weeds: BLM will monitor the areas used for camping and parking for the presence of new or spreading noxious weeds.

Threatened, Endangered, and Special Status Species: Ongoing monitoring of known Columbia spotted frog populations would continue.

Wildlife: ODFW big game count data will be used as an indicator of effects to wildlife.

This decision may be appealed to the Interior Board of Land Appeals, Office of the Secretary, in accordance with the regulations contained in 43 CFR, Part 4 and the enclosed Form 1842-1. If an appeal is taken, your notice of appeal must be filed in this office (at the above address) within 30 days from receipt of this decision. The appellant has the burden of showing that the decision appealed from is in error.

If you wish to file a petition pursuant to regulation 43 CFR 4.21 (58 FR 4939, January 19, 1993) or 43 CFR 2804.1 for a stay of the effectiveness of this decision during the time that your appeal is being reviewed by the Board, the petition for a stay must accompany your notice of appeal. A petition for a stay is required to show sufficient justification based on the standards listed below.

Copies of the notice of appeal and petition for a stay must also be submitted to each party named in this decision and to the Interior Board of Land Appeals and to the appropriate office of the Solicitor (see 43 CFR 4.413) at the same time the original documents are filed with this office.

If you request a stay, you have the burden of proof to demonstrate that a stay should be granted.

Standards for Obtaining a Stay

Except as otherwise provided by law or other pertinent regulation, a petition for a stay of a decision pending appeal shall show sufficient justification based on the following standards:

- (1) The relative harm to the parties if the stay is granted or denied,
- (2) The likelihood of the appellant's success of the merits,
- (3) The likelihood of immediate and irreparable harm if the stay is not granted, and
- (4) Whether the public interest favors granting the stay.
