# Klamath Falls Resource Area Planning Update

*Spring 2004*

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering the wisest use of our land and water resources, protecting our fish and wildlife, preserving the environmental and cultural values of our national parks and historical places, and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to assure that their development is in the best interest of all our people. The Department also has a major responsibility for American Indian reservation communities and for people who live in Island Territories under U.S. administration.

## **KLAMATH FALLS RESOURCE AREA PLANNING UPDATE Spring 2004**

The primary purpose of this Planning Update is to inform you about the activities on the Klamath Falls Resource Area. It is my desire to keep you informed about issues, activities, and opportunities I think are important to the public. More importantly, I am seeking ideas and comments from those who may be affected by multiple-use management programs here on the resource area.

This planning update is organized to make it easy for you to find projects of most interest. Projects have been arranged into categories (i.e., Recent Decisions, New Projects, On-going Projects, and Environmental Education Activities). In addition, each of these categories is sorted by resource topics (e.g., Lands Program, Timber Sales, etc.). The table will give you a brief description of activities occurring within the Klamath Falls Resource Area and for most projects a location. Refer to one of three maps following the table for locations of projects.

Additional information can be obtained from the contact listed in the project descriptions. If you have questions or concerns about the proposed actions, please call the Klamath Falls Resource Area and ask for the "Contact" person listed or the Resource Area Planner as soon as possible. The earlier you get involved, the more capability we have to take into account your comments and concerns when making final decisions on planned actions. Also be alert for news releases and public notices published in the Herald and News as projects reach stages for public involvement. If you want to provide comments to a specific environmental assessment, please send or deliver your written comments addressed to the Field Manager, Klamath Falls Resource Area, by the close of (or postmarked by) the last day of the comment period.

I would appreciate any comments or suggestions you may have regarding this planning update or how it could be improved to make it more useful to you. Planning updates are available on our web site at: [http://www.or.blm.gov/Lakeview/Planning/Plan\\_Updates.htm](http://www.or.blm.gov/Lakeview/Planning/Plan_Updates.htm). If you would prefer to review these documents on the web and no longer wish to continue receiving printed copies, please contact us to inform us of your preference.

Thank you for your continued interest in BLM's management of public lands. If you have any questions on this planning update, stop by the office or call (541) 883-6916.
