Klamath Falls Resource Area Planning Update

Summer 2000

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering the wisest use of our land and water resources, protecting our fish and wildlife, preserving the environmental and cultural values of our national parks and historical places, and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to assure that their development is in the best interest of all our people. The Department also has a major responsibility for American Indian reservation communities and for people who live in Island Territories under U.S. administration.

PLANNING UPDATE
Summer 2000

The primary purpose of this update is to keep you informed of activities on the Klamath Falls Resource Area. It is our desire to keep you informed about issues, activities, and opportunities we think are important to our public. More importantly, we are seeking ideas and comments from those who may be affected by our multiple-use management programs.

This planning update has been organized to give you a brief description of activities occurring in several programs. It contains listings of projects that have been completed recently, projects in analysis, and identifies newly proposed projects within the Klamath Falls Resource Area. Additional information can be obtained from the contact listed in the project descriptions. Community presentations by employees of the Klamath Falls Resource Area on resource topics are also listed.

If you have any concerns about the proposed actions, please contact the Klamath Falls Resource Area Project Contact or Planner as soon as possible. The earlier you get involved, the more capability we have to adjust or change planned actions. If you want to provide comments to a specific environmental assessment, please send or deliver your written comments addressed to the Field Manager, Klamath Falls Resource Area, by the close of, or postmarked by the last day of the comment period. Your comments and concerns are welcomed and may influence the final decision on these projects.

We would appreciate any comments or suggestions you may have regarding this planning update or how it could be improved to make it more useful to you.

Thank you for your continued interest in BLM's management of public lands. If you have any questions on information in this planning update, stop by the office or call (541) 883-6916.

DNA - Determination of NEPA Adequacy						
Resource Area	Conifer Tree and Bitterbrush / Mahogany Planting CX - The purpose of this CX is to plant seedlings within cut over areas for timber sales, obliterated roads, reclaimed rock stockpile areas, and wildfire areas needing conifer restocking. Approximately 125 total acres had conifer tree planting. Bitterbrush and mahogany planting were done on approximately 64 acres of mule deer winter range that were cleared of junipers. Forty-nine of the 64 acres had rigid vexar tubing applied to the seedlings to protect them from deer browsing.	Conifer Planting was done in the Kakapoo and Frosty TS west of Keno, Oregon in T38S, R5E, S.30-31; T38S, R6E, S.21, 28, 33. Wildfire areas on Bryant Mtn. were planted with conifers in T40S, R12E, S.1. Road obliteration plantings was done in T38, R5, S.30-31; T38, R6, S.21&33; T40S, R7E., S.21; T41S, R7E, S.3. Reclaimed rock stockpile areas were planted in T38S, R5E, S.35. Bitterbrush and Mahogany planting were done in T40S, R14 1/2E, S.14&23; T39S, R12E, S.27; and T41S, R14E, S. 17&20. Vexar tubing was applied in T39S, R12E, S.27; T41S, R14E, S.17&20.	No Known	Categorical Exclusion (CX) completed Projects completed.	April 7, 2000 June 3, 2000	Bill Johnson
Resource Area	**Tree Falling for Timber Cruises EA # 014-00-01.** The purpose of this project is to ensure accuracy of timber cruises.	KFRA	Matrix	EA completed Public comment period completed. Decision Issued on	Decision Record is expected to be issued in June.	Mike Bechdolt

DNA - Determination of NEPA Adequacy						
14	**Muddy Tom Timber Sale** - This sale was proposed in the Topsy/Pokegama/Hamaker Forest Health Treatments EA. Muddy Tom TS treats an estimated 1,900 acres and harvests approximately 4.5 million board feet of timber. This sale is designed as a density management/understory reduction. Other proposed treatments in the area include prescribed burning , precommercial thinning and fuels reduction.	T40S, R5E, S1, 3, 11, 15, 23, 25, 31 & 35 T40S, R6E, S31 South of Highway 66	Riparian Reserves District Designated Reserves Matrix	This sale was advertised on May 9, 2000. FONSI for the Topsy/Pokegama/Hamaker Forest Health Treatments EA was issued on 6/5/98.	The Sale date is June 9, 2000	Mike Bechdolt
1	**Completed Grazing Permit and Lease Renewal**	Brenda Allotment (0810)	No Known	A Determination of NEPA Adequacy to be completed for each permit/lease renewal to ensure compliance with the KFRA/ROD/RMP/RPS approved June, 1995	Brenda DNA completed on 5/16/2000. DNAs completed on 5/16/2000.	Bill Lindsey
2	**Completed Grazing Permit and Lease Renewal**	Four Bryant Mtn. Allotments: Warlow Allotment (0831) Bryant-Taylor Allotment (0857) Harpold Canyon Allotment (0895) SE80 Allotment (0805)	No Known	A Determination of NEPA Adequacy to be completed for each permit/lease renewal to ensure compliance with the KFRA/ROD/RMP/RPS approved June, 1995	Bryant-Taylor, Harpold Canyon, and Warlow DNA completed on 5/30/2000. SE80 Allotment DNA completed on 6/16/2000	Bill Lindsey
3	**Lorella Juniper Thin.** The purpose of this project is to reduce the amount of juniper in the area by mechanically severing the tree from its base. Severed junipers will be moved to a pile or stacked individually for utilization. Approximately 130 acres will be treated in this project. Public firewood area may be set up for the cut juniper.	T.39S., R12E., Sections 22,23,26,27	No Known	A Determination of NEPA Adequacy was completed for the juniper removal project to ensure compliance with the KFRA/ROD/RMP/RPS approved June, 1995	Lorella Juniper Thin DNA completed June 2000	Gayle Sitter

	New Projects					
4	**Gerber/Willow Valley Watershed Analysis.** The purpose of this project is to analyze the conditions of the watershed on Forest Service and Bureau of Land Management land, and come up with recommendations for improvement. These recommendations are then documented in a written watershed assessment to be completed by the Federal Agencies.	Gerber/Willow Valley Watershed	Riparian Hydrology	Field Analysis is beginning Public Scoping will begin in June of 2000.	Fall, 2001	Barbara Machado
5	**Gerber/Willow Valley Coordinated Resource Management Plan (CRMP) Watershed Analysis.** The purpose of this process is to involve the private landowners in the watershed analysis on private lands. This is done by forming a Local Planning Team made up of private landowners, State and Federal land managers, and concerned citizens. This Local Planning Team comes up with recommendations for improvement on private land which are then documented within the watershed assessment completed by Federal Agencies. This Analysis is for implementation of watershed and other future projects planned in the CRMP area.	Gerber/Willow Valley Watershed	Private Lands	CRMP meetings/discussions are continuing	Completion date Open-ended	Barbara Machado
7	**Barnes Valley Creek 3C Road Crossing** Improvement. The purpose of this project is to improve fish access through construction of a road crossing by placing concrete forms in the stream. This will prevent sediment from going downstream and impacting sensitive fish habitat when a vehicle crosses the stream.	Junction of Barnes Valley Creek & 3C's road. T39S, R14 ½ E, Sec. 22.	Redband Trout Lost River and Shortnose Sucker Habitat	Scoping Letter mailed out May, 2000. EA is being prepared	Fall, 2000	Andy Hamilton
51	**Baldy Crest Prescribed Burn** - This project proposes to burn 540 acres in the spring of 2001). The purposes of this project are to: Reintroduce fire to restore sustainable function and structure to plant communities, while reducing the potential for stand-replacement wildfires, and reducing overall fire management costs. Another purpose is to reduce fuel loadings within the Old Baldy Research Natural Area (RNA).	T.38S., R.15E., Sec. 19, 30	Old Baldy RNA Northern spotted owl Pacific Crest Trail	A Determination of NEPA Adequacy (DNA) to be completed for activities within the RNA to ensure compliance with the KFRA/ROD/RMP/RPS approved June, 1995	DNA completed on June 9, 2000	Lou Whiteaker

	New Projects					
29	**Upper Klamath Basin and Wood River Wetland Resource Management Plan Amendment for the Fourmile Creek portion of this area.** The purpose of this project is to amend the Upper Klamath Basin and Wood River Wetland Resource Management Plan EIS, in order to designate the Fourmile Creek area as an Area of Critical Environmental Concern (ACEC). The first step in that process is preparing an ACEC evaluation of relevant and important values of the Fourmile Creek area.	Fourmile Creek Wetland	Riparian Wetland ACEC	ACEC Evaluation is underway	June 2001	Lou Whiteaker or Bill Lindsey
Resource Area	**Late-Successional Reserve (LSR) Assessment.** A single Late Successional Reserve Assessment is in preparation that will assess all 19 Unmapped Late Successional Reserves designated within the resource area. The purpose of the assessment is to develop management recommendations for these areas where needed to restore or maintain late successional habitat. The Late Successional Reserve Assessment will be submitted to the Regional Ecosystem Office (REO) in late FY 2000 for review and approval.	BLM lands west of Highway 97 covered by the Northwest Forest Plan	Unmapped Late Successional Reserves.	The interdisciplinary team is formulating management recommendations based on an assessment of current conditions.	September 2000	Lou Whiteaker
Resource Area	**Memorandum of Understanding (MOU) between the Klamath Tribes and BLM for Coordination on Management Issues**. The purpose of the MOU is to identify a process to coordinate and communicate tribal involvement with BLM management actions on public lands.	Lakeview District	Former Tribal Lands	The draft MOU was presented to the Tribal Council on February 22, 2000. Waiting for Tribal feedback.	Unknown	Larry Frazier
50	**Brady Butte Prescribed Burn** - This project proposes to burn 2,500 to 5,000 acres in the fall (October or November of 2000). The purposes of this project are to: Reintroduce fire to restore sustainable function and structure to plant communities, while reducing the potential for stand-replacement wildfires, and reducing overall fire management costs.	T.41S., R14 ½ E.	Bald Eagle	Planned projects tier to the Programmatic Fire EA (OR-014-94-09) approved on 4-29-94. No further decision documents are required.	Analysis Completed Project to be implemented in Fall of 2000	Joe Foran

11	**Fuels Maintenance Treatments #2 (KCER - 00-03** The proposed action is to use prescribed fire to remove fire-prone brush, excessive levels of hazardous fuels (less than 6" in diameter), and removal of small conifers that are ladder fuels and threats to over story trees by crown fire. Approximately 1,200 acres will be treated.	Klamath Falls Resource Area, east of Hwy 97. See Prescribed Fire Map for locations.	No known	Analysis is continuing	Summer 2000	Dale Brush
35	**Wild Horse Gather** - This project entails the live capture and removal of up to 20 head of wild horses from the Pokegama Wild Horse Herd Management Area (HMA) using a bait trapping method. The purpose of this project is to ensure the numbers of horses stay within habitat capacity and herd management level (30-50 head), and stay largely on BLM lands within the herd area boundaries.	Pokegama Herd Management Area north and east of Klamath River, south of highway 66, east of Jenny Creek.	No known	EA (OR-010-95-10) completed 6/22/95. Topsy-Pokegama Landscape Analysis completed July 1996.	Horse capture activities will end June 8, 2000. 18 horses were captured in the spring of 2000 from the Pokegema Herd Management Area.	Tonya Pinckney or Bill Lindsey
26	**Grazing Permit and Lease renewal** - Grazing permit or leases due for renewal in FY2000.	Bryant-Loveness Allotment (#0839)	No known	A determination of NEPA Adequacy to be completed for each permit/lease renewal to ensure compliance with the KFRA/ROD/RMP/RPS approved June, 1995	Summer 2000	Bill Lindsey
27	**Grazing Permit and Lease renewal** - Grazing permit or lease due for renewal in FY2000.	Edge Creek Allotment (#0102)	No known	A determination of NEPA Adequacy to be completed for each permit/lease renewal to ensure compliance with the KFRA/ROD/RMP/RPS approved June, 1995	Summer 2000	Bill Lindsey

13	**Riparian Thinning (EA No. OR-014-11)** - The proposed action is to thin the under story trees over approximately 100 acres within Riparian Reserves to reduce forest health problems and an increased fire hazard. These treatments will meet Aquatic Conservation Strategy Objectives.	Spencer Creek Watershed	Riparian Reserves	Analysis is ongoing. EA out for public comment from May 26 thru June 26, 2000.	Summer of 2000	Dana Eckard
15	**Clover Hookup Timber Sale** - This sale was proposed in the Lower Spencer Creek Forest Health Treatments EA. Clover Hookup TS treats an estimated 900 acres and harvests approximately 2 million board feet of timber. This sale is designed as a density management/under story reduction. Other treatments include prescribed burning, thinning and fuels reduction.	T38S, R6E, S24, 25, 27, 33-35. Spencer Creek Watershed	Riparian Reserves District Designated Reserves	This sale is being prepared on the ground. FONSI for the Lower Spencer Creek Forest Health Treatments EA was issued on 5/17/96.	Proposed Sale date Sept. 2000	Mike Bechdolt
16	**Slim Chicken Timber Sale** - This sale was proposed in the Topsy/Pokegama/Hamaker Forest Health Treatments EA. Slim Chicken TS treats and estimated 2,000 acres and harvests approximately 2.5 million board feet of timber. This sale was designed as a density management/under story reduction. Other treatments include prescribed burning, thinning and fuels reduction.	T40S, R7E, S19, 21, 29, 31 South of Hwy 66	Riparian Reserves District Designated Reserves Matrix	This sale is being designed on the ground. FONSI for the Topsy/Pokegama/Hamaker Forest Health Treatments EA was issued on 6/5/98.	Proposed Sale date 2001	Mike Bechdolt
17	**Grenada West Timber Sale** - This sale was proposed in the Topsy/Pokegama/Hamaker Forest Health Treatments EA. Grenada West TS treats an estimated 1,300 acres and harvests approximately 2.5 million board feet of timber. This sale is designed as a density management/under story reduction. Other treatments include prescribed burning, thinning and fuels reduction.	T40S, R6E, S23, 35 T40S, R7E, S7 T41S, R6E, S1, 2, 11,13	Riparian Reserves District Designated Reserves Matrix	Design of this sale on the ground has been deferred for a couple of years. FONSI for the Topsy/Pokegama/Hamaker Forest Health Treatments EA was issued on 6/5/98.	2002	Mike Bechdolt

	Ongoing Projects					
45	**Upper Swan Prescribed Burn** - This project proposes to burn approximately 98 acres in the spring of the year. The purposes of this project are to: Reintroduce fire to restore sustainable function and structure to plant communities, while reducing the potential for stand-replacement wildfires, and reducing overall fire management costs.	T37S, R10E, Sec. 24 & 25 T37S, R11.5E, Sec. 31	Bald Eagle	Planned projects tier to the Programmatic Fire EA (OR-014-94-09) approved on 4-29-94. No further decision documents are required.	Analysis Completed Project delayed until the Fall of 2000 or the Spring of 2001	Joe Foran
46	**Oak Thinning Prescribed Burn** - This project proposes to burn approximately 30 acres in the spring of the year. The purposes of this project are to: Reintroduce fire to restore sustainable function and structure to plant communities, while reducing the potential for stand-replacement wildfires, and reducing overall fire management costs.	T41S, R5E, Sec. 11	No known	Planned projects tier to the Programmatic Fire EA (OR-014-94-09) approved on 4-29-94. No further decision documents are required.	Analysis Completed Project delayed until the Spring of 2001	Joe Foran
9	**Upper Spencer Creek/Surveyor Mountain Timber Sale EA.** The purpose of this EA is to analyze proposed commercial and non-commercial treatments. Up to 15 million board feet of timber would be harvested from 1500-2000 acres. Other treatments include: watershed restoration, road obliteration, construction, and improvement, precommercial thinning, fuels reduction, prescribed burning, and reforestation.	Surveyor Mountain T38S, R5E, S.25, 26, 36 T39S, R5E, S.1, 12 T39S, R6E, S6&7.	Matrix Riparian Reserves	Preparing EA	September 2000	Mike Bechdolt
