MEDFORD, OREGON 97504

ROGUE NATIONAL WILD & SCENIC RIVER HELLGATE RECREATION SECTION HAZARDOUS FUEL REDUCTION PROJECT

ENVIRONMENTAL ASSESSMENT'S SUPPORTING ANALYSIS AND DOCUMENTATION

ERRATA 9/23/03

1. Table 4-21 (P. 42) is corrected to read:

Land Designation	Pre-Project Habitat acres			Post-Project Habitat acres		
	Nesting	Foraging	Dispersal	Nesting	Foraging	Dispersal
Within CHU Only	0	415	0		415	
Within CHU & LSR	136	0	0	136		
Within CHU or LSR	0	0	1,215			1,215
Outside CHU & LSR	0	639	0			639

* The basis for these acreage estimates are stands mapped as Vegetation Condition Class 7 and 8 (large pole stands / mature stands) in the Medford District Inventory records. This is a much broader habitat index than McKelvey 1 and 2 NSO habitat indices (nesting / roosting / foraging habitat, and roosting / foraging habitat). Acres of McKelvey 1 and 2 habitats in the project area are: 0 acres of McKelvey 1, and 167 acres of McKelvey 2.

(Explanation of correction: The post-project habitat acreage within the CHU was incorrectly stated to be 415 acres of dispersal habitat and 0 acres of dispersal habitat. The post project habitat acreage is corrected to read 415 acres is foraging habitat and 0 acres of dispersal habitat. The footnote is also added.)

2. Section 4.8.2A.1(2,3,4) on page 42:

The paragraph which states “CHU located outside of the LSR includes 415 acres of foraging habitat. The proposed actions would reduce the habitat quality to dispersal habitat” is corrected to read:

“CHU located outside of the LSR includes 415 acres of foraging habitat. The proposed actions could degrade this habitat, but not to the extent that it would not continue to provide foraging habitat. Thus, while the project may affect critical habitat it would not result in adverse modification to the critical habitat, it would not compromise the overall function of the CHU.”
