Prineville, Oregon 97754

Dear Mr. Tippy,

I have received and reviewed the EA for the Little Canyon Fuel Reduction Project. This project should have been on the drawing board and taken care of many years ago. Too many trees have been killed and wasted. Looks like many more trees are on their way out as I write this.

As I sit on my deck and look up at the mountain, I see a severely over stocked stand of trees, badly in need of a major thinning. We can give it to the bugs or save what we can by rolling up our sleeves and selecting Alternative D.

Sincerely,

  
Larry Baughman
