Dan Tipper  
BLM.

Some appreciated all the work you folks did on the Little Canyon Monday E-H. Very thorough. The condition I would choose is D+ E. Mainly to rock the road & improve drainage. The first mile & half is the worst. The High School stop come up & chew back & forth in wet weather. Only salvation is to rock the road.

Thinning the dog hair patches is also good & to harvest the large evergreen Pines. Your outline of fuel reduction is a good workable plan.

I hope you are able to put your plan in operation this year.
