

# Salem District Bureau of Land Management Project Update September 2004

BLM  
Salem District

**Public Lands: Use, Share, Appreciate**

Dear Citizen:

The Project Update is published to provide current information about specific projects and future events planned on Bureau of Land Management's Salem District lands. It is our intent to increase the public's awareness of BLM issues, activities, and opportunities. More importantly, we are seeking ideas and comments from those who may be affected by our multiple-use management programs. Your ideas, comments, and participation help us make informed decisions and implement better projects.

This Project Update is organized by resource area and within each resource area by type of project. Additional information can be obtained from the BLM staff listed as contacts.

Please send written comments, including the specific project name, to the appropriate address listed below during the identified public comment period. If you wish to save paper and postage, and you have access to the internet, you can find the Project Update at [www.or.blm.gov/salem](http://www.or.blm.gov/salem) or E-mail us at [or080mb@or.blm.gov](mailto:or080mb@or.blm.gov).

Salem District Manager

Current projects are described in Tables 1 – 4.  
FY 2004 and FY 2005 timber sales are described in Tables 5 & 6.

**Explanatory comments concerning the Tables 1-4:**

Projects are organized by project type, project name/description, location, planning status, and contact person. A project may include the following stages:

*Developing Proposed Action* -A site-specific proposal, called a Proposed Action, is developed to move the existing condition of an area towards a desired condition or result.

*Scoping* -Public comment is sought on the Proposed Action. Comments are used to refine the proposal or to identify issues which will define the scope of analysis and alternatives to be considered.

*Developing Alternatives* -A range of alternatives is developed based on the issues raised during scoping, while addressing the purpose and need for the project.

*Analyzing Effects* - The effects of implementing the alternative(s) are determined and documented in an EIS (Environmental Impact Statement), EA (Environmental Assessment), CX (Categorical Exclusion) or DNA (Determination of NEPA Adequacy).

*Comment Period* - Comments are generally sought for 60 days on a draft EIS, and for 30 days on an EA and FONSI (Finding of No Significant Impact). There are no established comment periods for a CX or DNA. Comment periods are established commensurate with the anticipated level of public interest.

*Notice of Decisions* - Notice of decisions from an EIS and EA will be published in “a newspaper of general circulation in the area where the lands affected by the decision are located” and sent to those who have requested such. Notices of decision from an EIS will also be published in the Federal Register. Notice for projects which qualify as a CX or DNA will be available for public review at the appropriate Field Office.
