

BLM Study Review of Hells Canyon Studies

E.3.2-11 Survey of Waterfowl Broods

1. INTRODUCTION

This study is strictly a baseline survey!

2. CONCLUSION

3. STUDY ADEQUACY

The study is inadequate since data was not collected on shoreline waterfowl nesting locations, productivity, habitat condition and the effects of reservoir level fluctuations during HCC operations on waterfowl.

4. BLM CONCLUSIONS AND RECOMMENDATIONS

CONCLUSIONS:

RECOMMENDATIONS: Relationship between breeding times, nesting locations and IPC operation of water levels in the Hells Canyon Complex should have been provided to identify impacts on waterfowl production.
